m2trust
it security.

Who we are

Our expertise in the PKI environment makes us a pioneer for digital IT security solutions. With our products, we help large companies manage digital certificates more efficiently, securely, and fully automated. We do this with verve and commitment. We are professional, tech-driven, digital, and innovative. We learn from you, and you learn from us. But more important than your knowledge is your personality: in the team, every single person counts, and we work hand in hand to advance our goals together. As an addition to our IT team, we are looking for more enthusiastic colleagues for the role as

Test (Automation) Engineer (m/f/d)

Your Role

You will be part of a test team that accompanies and supports our development at all levels of the test pyramid. In order to keep and further develop the quality standards of m2trust software development you will support our teams depending on your skills and preferences with the:

- Identification, implementation, execution, and monitoring of functional and non-functional test cases
- Deriving test scenarios from business requirements and documenting them in the test management tool
- Analyzing and evaluating test results, identifying errors, and working out solutions together with our development teams
- Creation of defect and error reports
- Definition and implementation of suitable test automation strategies
- Implementation and maintenance of extensive test suites
- Integration of test execution in a continuous integration pipeline
- Processing of third-level support tickets (via telephone, email, and ticket system)

Your Profile

- First or several years of professional experience in the environment of software quality and test management
- Knowledge in the use of test management tools
- Experience in agile project management and IT process management
- Ideally ISTQB certification
- Very good English language skills
- Nice to have would be German language skills and experience in Azure DevOps and/orTest Tools/Frameworks/Libraries

Benefits

- Permanent position with attractive salary
- Flexible working hours & mobile working
- Extensive continuing education and training platform
- Career opportunities in a successful, fast-growing company
- Various projects for well-known customers
- Very good working atmosphere and highly motivated, international colleagues
- Modern workplace in a charming environment in the center of Stuttgart

If you enjoy challenging projects in the fast-growing IT security environment and enjoy working closely with well-known manufacturers and customers, providing them with advice and support, please send us your application with CV, your salary requirements and availability, or feel free to call us: Renate Busch Tel. +49 (0)711-96000115.
